

SURUTHI VIJAYA R

Software Developer | Full-Stack Developer

+91 74188 42688 | suruthi.vijaya.aiml@gmail.com | Madurai, Tamil Nadu, India | [GitHub](#)

PROFESSIONAL SUMMARY

2026 B.E. Computer Science (AI & ML) graduate with hands-on experience in full-stack web development using React.js, Node.js, Express.js, MongoDB and REST APIs. Built role-based application workflows, database-driven applications and real-time features using Socket.IO. Also experienced with Java, JDBC and MySQL through backend-focused projects, with a 3-month frontend development internship using Flutter and Git/GitHub. Seeking an entry-level software development role where I can contribute to application development and grow with the team.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, Python

Frontend: React.js, HTML5, CSS3, Flutter (Basic)

Backend: Node.js, Express.js, REST APIs, JWT, JDBC

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, Android Studio

Core: OOP, DSA Fundamentals, DBMS, Authentication & Authorization

EXPERIENCE

InnoAivators — Frontend Developer Intern

May 2026 – July 2026

- Developed and implemented application screens for a cross-platform product using **Flutter and Android Studio**.
- Worked within an existing application codebase and gained hands-on exposure to **frontend API integration**.
- Used Git and GitHub for version control while collaborating on frontend development tasks with the team.

PROJECTS

AI Freelance Marketplace — React.js | Node.js | Express.js | MongoDB | REST APIs | Socket.IO

- Built a full-stack freelance marketplace with **role-based authentication** and separate client/freelancer workflows.
- Developed REST APIs for **project creation, proposal submission, hiring and contract milestone workflows**.
- Integrated AI-assisted **proposal generation and resume parsing** and implemented real-time updates using Socket.IO.
- Integrated the milestone workflow with the Ethereum Sepolia testnet for blockchain-based verification/settlement exploration.

Lung Disease Analyzer — Python | FastAPI | Next.js | TensorFlow

- Collaborated as part of a 2-member team to build a system for identifying lung diseases from respiratory audio using spectrogram-based audio processing and a TensorFlow model.
- Developed the application workflow using Python and FastAPI for backend/model integration and Next.js for the frontend.
- Achieved 88.7% accuracy on the ICBHI dataset while working on the audio-based disease classification system.

Student Management System — Java | JDBC | MySQL

- Built a Java CRUD application to manage student records, applying core OOP principles.
- Used JDBC with MySQL and the DAO pattern to separate data access from application logic, with exception handling for database operations.

EDUCATION

Qualification	Institution	Year	Result
B.E. Computer Science (Artificial Intelligence & Machine Learning)	Sethu Institute of Technology	2022–2026	8.47/10
Higher Secondary Certificate (HSC)	OCPM Girls Higher Secondary School	2022	83%
Secondary School Leaving Certificate (SSLC)	OCPM Girls Higher Secondary School	2020	78%

ACHIEVEMENTS & CERTIFICATIONS

- 30-Day DSA Practice Challenge** — Completed a self-initiated 30-day Java DSA challenge with daily progress updates on LinkedIn.
- 100+ LeetCode Problems** — Solved 100+ algorithmic problems in Java.
- CodeChef Problem Solver – Diamond Badge** — Achieved 1000/1000 problem-solving score.
- Smart Worker Award** — Recognized for contributions to department symposium and association activities.
